

SMART SEATS With a mesh that's made to withstand Australia's harsh environment and a powder coated finish that defies rust, the Zero Gravity® Recliner Chair is the ideal accessory for pool owners with back problems. Initially developed by NASA, this unique technology features a specialised suspension system that relieves pressure from the spine and stress from the whole body.

The Zero Gravity® is manufactured by LAFUMA, a French-based company that is committed to eco-design by using natural, versatile and sustainable materials such as wood fibre, natural resin as glue, recycled plastic loaded with wood fibres, and hemp. Available from Bad Backs, Zero Gravity® is both a sleek and smart addition to outdoor entertaining areas.

HEAVY METAL Protect your garden furniture, planters, gates, letterboxes, gutters and gardening tools made from metal with a protection paint that is touch dry in six hours. Rust Guard, by White Knight Paints, primes and top-coats new or rusted ferrous metals in one simple application – providing long-lasting metal protection on a myriad of colour choices. Rust Guard epoxy enamel transforms rusty surfaces into a tough gloss finish that's ideal for people living in coastal areas where metal tools and outside furniture are exposed to corrosive, salty winds. Rust Guard is available nationally from hardware stores and paint outlets
